

# SCREENSHOTS OF CHEMFILLA PROJECT

Chemfilla is an educational app built on the android platform; it is very much in its development stage. The team has made some considerable progress especially in the creation of the activities, taking into consideration both portrait and landscape mode as well as the database for the app. There are a few screenshots shown below:

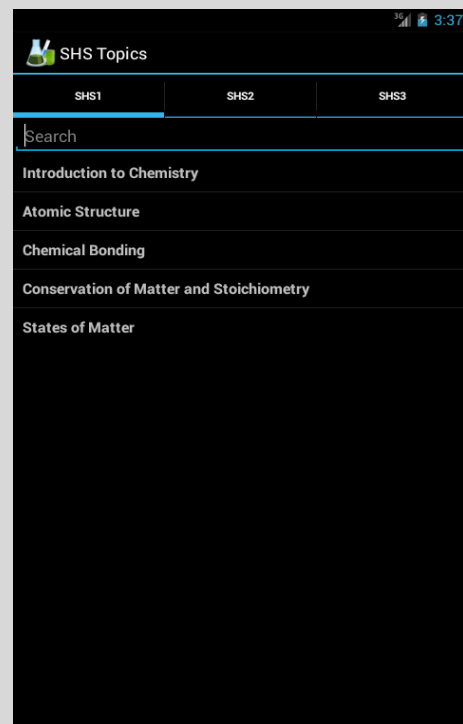

**SPLASH SCREEN**

This is the welcome screen of the app. It is the first screen that is shown when a user clicks the Chemfilla icon in the menu.

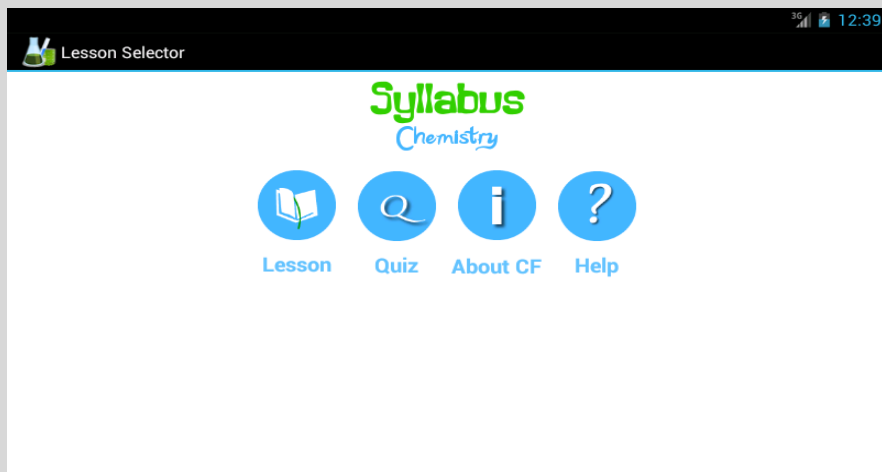

**TOPICS SHS2**

The list of all topics in the Chemistry syllabus of the Ghana Education Service for Senior High Schools is displayed here. The topics are listed below their respective levels: SHS1, SHS2 and SHS3. Users have the added feature of a quick search bar.

**TOPICS SHS1**

**SELECTOR**

This activity contains four main image buttons: lesson, quiz, about and help; which leads to the next activity of the user's choice.
